Lofty

# The Everyday Reality of a Real Estate Agent

**Constant lead follow-up**
Manually tracking hundreds of leads across spreadsheets and notepads

**24/7 availability pressure**
Clients expect instant responses nights, weekends, and holidays

**Endless paperwork**
Contracts, disclosures, and compliance documents eat hours of every day

**Scheduling chaos**
Coordinating showings, inspections, and closings across multiple deals

The average agent spends

**74%**

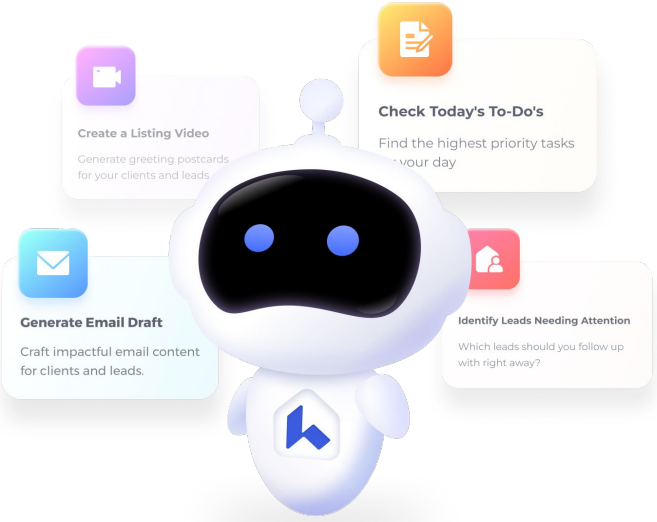
of their time on admin tasks instead of selling

Lofty

# Introducing Lofty

Lofty is the AI-powered real estate platform built to help agents and teams manage their entire business — from lead generation to closing day.

We serve thousands of real estate professionals across North America with a fully integrated platform that eliminates tool sprawl and puts AI at the center of every workflow.



**1,000s**
of agents served

**All-in-one**
platform

**#1**
AI OS for real estate

Lofty

# The Complete Real Estate Platform

Everything an agent needs, in one place, powered by AI

### CRM & Contact Management

Track leads, clients, and relationships across your entire pipeline

### AI-Powered Lead Nurturing

Automated follow-ups and smart recommendations powered by AI

### Marketing Suite

Email campaigns, social media management, and listing promotion

### Transaction Management

Deal tracking, document management, and compliance tools

### Team Collaboration

Lead routing, performance analytics, and team visibility

Lofty

# What Sets Lofty Apart

### Truly All-in-One

No more 5+ disconnected tools. CRM, website, marketing, transactions, AI insights all in one login.

### AI-Native by Design

AI is woven into every workflow.

### Built for Real Estate

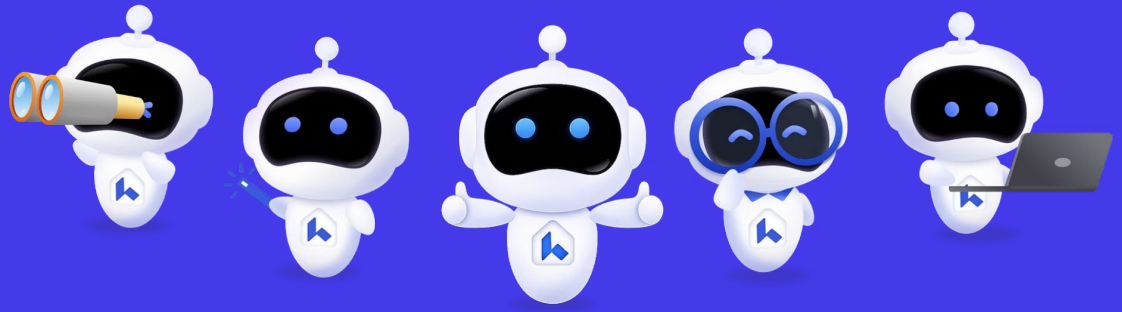
Deep industry specificity. Hot sheets, IDX websites, MLS integration out of the box.

### Autonomous Agents

Lofty AOS deploys AI agents that work 24/7 — following up, qualifying, and nurturing leads.

# Lofty AOS

The First Agentic AI Operating System For Real Estate



Lofty

INTRODUCING

# Lofty AOS

## Agentic AI Operating System

The first AI OS built specifically for real estate. Unlike traditional AI tools that provide isolated features, Lofty AOS deploys specialized AI agents that understand context, take autonomous action, and complete workflows end-to-end.

- **Understands context**
- **Takes autonomous action**
- **Completes workflows end-to-end**

# What Lofty AI Does for You

### Smart Lead Scoring

Scores every lead 0–100 based on behavior, contact quality, home price, and web activity

### Autonomous Follow-up

AI agents send personalized follow-ups at the right time — no manual action needed

### Today's Opportunities

Behavioral signals surface High Interest, Back to Site, Sell, and Back on Market leads

### Smart Plans

AI-generated nurture workflows that combine drip campaigns with scheduled agent tasks

### Showing Automation

Real-time showing requests synced to calendar with auto-routing to team members

### Hot Sheet Intelligence

Auto-matches new MLS listings to buyer leads whose saved searches fit the property

PART 4

# Your Challenge

GlobeHack Season 1 Case Study

Arizona State University · April 18–19, 2026

Lofty

# The Lofty Platform Today

When a user logs in today, they see a dashboard of powerful modules — but have to do the prioritization themselves:

### Need Keep in Touch
Contacts due for follow-up based on relationship milestones

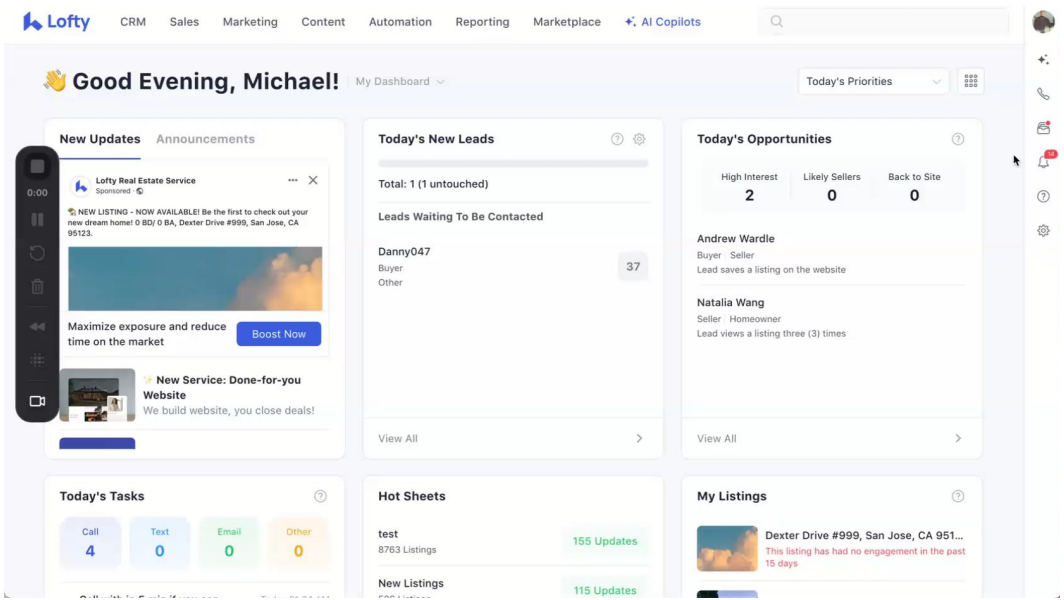
### Today's Opportunities
High-priority leads flagged by behavioral AI

### Transactions
Active deals tracked from offer to closing

### Appointments & Showings
Scheduled tours and client meetings

### My Listings
Properties the agent is marketing for sale

### Hot Sheets
Real-time MLS filters with buyer matching



Lofty

# The Lofty Problem

> With a platform that can do everything, how do we pick what gets front stage?

**AI capabilities exist**

Lead scoring, behavioral signals, Smart Plans — all running in the background

**But they aren't front-and-center**

The daily experience still feels like a traditional widget dashboard

**How should users FIRST EXPERIENCE Lofty as an AI-native platform?**

Lofty

# Your Mission: Pick an Entry Point

Reimagine how users first experience Lofty as an AI-native platform.

| | |
|---|---|
| **Dashboard Redesign** | Transform the daily landing page from static widgets to an AI-driven command center |
| **AI Command Center** | A new conversational interface where users tell AI what they want to accomplish |
| **Morning Briefing** | AI proactively tells users what matters today and exactly what actions to take |
| **Onboarding Flow** | How new users are introduced to AI capabilities and build trust with the platform |
| **Something Else** | Surprise us — if you see a better entry point, go for it. We love bold thinking. |

Build and present a clickable prototype or coded demo to the Lofty team!

Lofty

# What to Deliver

## 1. A Demo of Your Vision

- Interactive prototype (Figma, Framer, or similar)
- Coded demo — React, HTML, or any framework
- Video walkthrough demonstrating the experience

📌 *Use realistic content: real estate data, agent names, property details*

## 2. Design Rationale

- Why you chose this entry point and what problem it solves
- Key design decisions and trade-offs you made
- What you'd build next with more time

📌 *Annotations in prototype, written summary, or narrated video*

Use AI tools! Claude, ChatGPT, Cursor, v0, Galileo — AI usage is encouraged and evaluated as part of your submission.

Lofty

# Questions to Guide Your Thinking

### Why this entry point?

What specific user problem are you solving with your chosen approach?

### Who is the target user?

What are their daily goals, pain points, and concerns about AI?

### What makes it AI-native?

How is this fundamentally different from just adding AI features on top?

### How does it build trust?

How does your design address skepticism from users new to AI tools?

### What trade-offs did you make?

What did you cut, and what would you build next with more time?

### How would you measure success?

If this shipped, what metrics would tell you it's working?

We want to see product thinking, design craft, and the ability to ship a tangible solution.
